Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 13-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11-12 of U.S. Patent No. 6,325,913 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims when read in light of the specification clearly encompasses and is rendered obvious by the claims of the patent.

The patented claims disclose the steps of holding the steel strip so that the steel strip is not submerged in the electrolyte, a step of jetting the electrolyte to

Art Unit: 1753

the steel strip, a step of supplying voltage to a jetting electrolyte, a jet of electrolyte passing through air to the steel electrically contacts with the steel strip and a electric current passes between the jet of electrolyte and the steel strip (see claims 11-12). The reference further discloses the step for adjusting the pressure (see claim 12).

The patented claims do not recite that the current is constant. The use of the constant current would be an obvious modification, because such modification of a result effective variable has been held to be within the purview of the ordinary artisan.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Sakai et al (Sakai), European Patent Application 0086115 A1.

The Sakai patent discloses the steps of holding the steel strip so that the steel strip is not submerged in the electrolyte (page 5, lines 20-26 and figure 4), a step of jetting the electrolyte to the steel strip (page 5, lines 28-38), a step of supplying voltage to a jetting electrolyte, a jet of electrolyte passing through air to the steel electrically contacts with the steel strip and a constant electric current passes between the jet of electrolyte and the steel strip (see page 19, line 35 through page 20, line 12). The reference further discloses the step for adjusting the pressure (see page 20, lines 1-13).

Therefore, since the Sakai patent discloses each and every limitation, the claims are anticipated.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun S. Phasge whose telephone number is (703) 308-2528. The examiner can normally be reached on MONDAY-THURSDAY, 7:30-6:00.
